Front-end Developer

Amsterdam area · 8 years in front-end development

01 Profile

I'm a front-end developer in the Amsterdam area with eight years of experience building for the web, mostly in Vue, TypeScript and React. At AFS Group I build web applications with Vue.js, TypeScript and GraphQL that scale and put the user first, and I bring AI into that work. Before that I built responsive, fast interfaces and a smoother development workflow at Bitvavo and gracious.

Lately I design workflows in which AI agents write production code: work is split into small tasks, every change is reviewed and verified, and a person approves the merge. I like work I can check. I write the tests before the code, keep each change small, and don't call something done until there's proof. I work best in a cross-functional team where things get said plainly. I'm fluent in Dutch and English. When something breaks, I find the cause and turn it into a test, a check or a rule, so the same mistake doesn't come back.

02 Experience

Apr 2023 — Now

Front-end Developer · AFS Group

Amsterdam · Full-time · Hybrid

I build web applications with Vue.js, TypeScript and GraphQL that scale and put the user first, and I bring AI into that work.

Sep 2021 — Mar 2023

Frontend Developer · Bitvavo

Amsterdam · Full-time

I built responsive, fast interfaces in React, JavaScript and HTML, and worked on a smoother development workflow.

Dec 2020 — Sep 2021

Frontend Engineer · gracious

Amsterdam · Full-time

I built responsive, fast front ends in HTML and found quicker ways to develop them.

Oct 2018 — Nov 2020

Software Developer · WebAds

Amsterdam · Full-time

I maintained and designed new modules for a custom ad-tagging library, and introduced React and Node.js. I planned my own work so assignments landed on time.

May 2015 — Sep 2018

Security Host · D&B The Facility Group

Randstad

Sites I worked at: VodafoneZiggo, World Trade Center Amsterdam and BNY Mellon.

2014 – 2015

Trainee Security Officer · City of Amsterdam, Centrum district

Randstad

- Surveillance
- Access control
- Patrol rounds and reporting
- Reference letter available

2011 – 2012

Web Developer · International Model Management

Randstad

- Built websites for different purposes
- Made newsletters
- Wrote manuals

2010 – 2011

Web Developer · Glimworm IT b.v.

Randstad

- Implemented websites in a CMS
- Formatted content for websites
- Gained a basic knowledge of PHP, C and C++

2007 – 2008

Web Developer · KIT

Amsterdam

Developed websites for various small businesses.

03 Education

2011 – 2012

Game and Interactive Media Design · Amsterdam University of Applied Sciences (Hogeschool van Amsterdam)

2013 – 2015

Security · ROC TOP

2007 – 2011

ICT Application Developer, level 4 · ROC Fraijlemaborg

2003 – 2007

VMBO-K, Computer Installation and Repair Technology/Technician · ROC Treublaan
